

# Junction Box for Remote Setup and Diagnostic

## CR4500DC

### Presentation

When the **Rota-Sonde DC4500** is not easy to access, the junction box **CR4500DC** permits the user to setup the sensor remotely. It offers the same possibility and interface as if user is behind the HMD itself, for example to switch ON/OFF laser for checking alignment of the sensor.

The window on the front door allows users to see directly live signal from photocell, threshold setup and to check status of sensor (detection, control, alarm, active sensitivity range).

### Technical characteristics
